

AG-S100

3D Glasses

Is it 3D? Or something better?

To experience LG's 3D technology you need a 2010 LG 3D ready TV and LG's 3D Active Shutter Glasses. The glasses communicate seamlessly with the TV's emitter. In-turn a 3D image is created when the glasses alternately pass and block the light to each eye. The result is a beautiful, full HD 1080p 3D experience that brings you closer to the action from the comfort of your living room.*
