- IntuiTouch™ Control System
- IntuiScroll™ Scrolling Display
- Self-Cleaning
- 2 Full-Width Racks/1 Split Rack/ 1 Convection Roast rack with 7 Rack Positions
- GoCook™ Smart Oven Light
- Warming Drawer

Smart ThinQ™ Technology*

There's more to cooking than just heating up food. Our **Smart ThinQ™** range interfaces with the LG cooking management app, making it easier than ever to plan meals for your family, set precise temperature control remotely, even monitor the oven's self-cleaning feature. The LG Smart ThinQ™ Range is just one of the ways that LG helps you make the most of every moment... in and out of the kitchen.

Infrared Grill Technology

LG introduced the industry's first infrared heating element. The infrared grill gets your oven to a broil temperature **without the need to preheat and cuts over 20% of your total cooking time.** Infrared cooking uses the same technology as premium outdoor grills.

Largest Capacity

With LG's large capacity oven (**6.3 cu ft.**), the largest electric oven in the industry, you can handle all of your family's cooking needs. Whether you're baking large batches of cookies or a roast for the holidays, this oven can fit it all.

* Internet connection required & sold separately.

Smart Grid monitoring technology not currently available. May not be compatible with all systems if and when introduced by power companies. SmartDiagnosis™ is designed to supplement existing methods of problem identification and may not be able to troubleshoot all issues.
