### TurboDrum

**LG TurboDrum** - allows the drum and the pulsator to rotate in opposite direction to each other. This improves the washing action, giving an efficient wash.

### No Agitator

**No Agitator** - with no agitator taking up valuable space inside the tub, you can fit bigger loads and not have to worry about loads becoming unbalanced. Having no agitator also helps to minimise stretching or tangling.

### Transparent Glass Lid

**Transparent Glass Lid** - a strong transparent glass lid that provides easy viewing of drum contents.

### Fuzzy Logic

**LG Fuzzy Logic** washing machines have a number of sensors. These sensors continually monitor the varying conditions inside the drum, which helps to ensure the optimum washing performance.
