SMART LEARNER™#

Provides Optimal Storage Algorithm based on Usage Pattern Analysis

*After open for 10 minutes continuously. #Smart Learner operation controlled and monitored only in LG ThinQ™ App. Smart connectivity performance depends on network performance, may vary due to ISP and WiFi.

Smart Connectivity

Smart Learner™

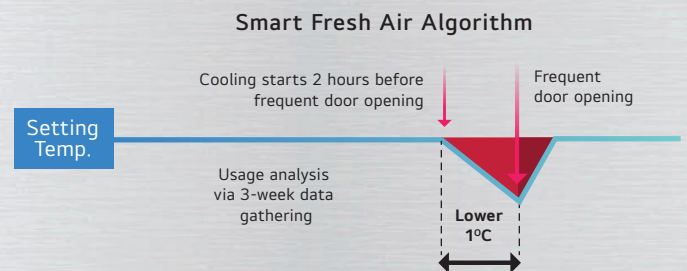

Your refrigerator just got a lot smarter with Smart Learner™.

LG's Smart Learner Technology learns your pattern for over three weeks. Then it optimizes everything from energy and cooling performance to energy consumption as per your usage.

Smart Fresh Air

Applies algorithm to analyze usage pattern and optimizes temperature.

Smart Fresh Air minimizes the rise in inner temperature with the help of intensive cooling algorithm just two hours before user's frequent door opening time. It does so by accumulating data on hourly, daily, and weekly basis.

ALL NEW LG Frost-Free Refrigerator

Freshness & Cooling

Seals in farm freshness for long.

Freshness

HygieneFresh⁺TM

Introducing HygieneFresh⁺TM, a powerful air filter that helps up to 99.99% reduction in activity of bacteria. While it keeps your refrigerator free of bacteria and odors, it also deodorizes and purifies the air inside the refrigerator.

What is HygieneFresh⁺TM?

LG HygieneFresh⁺TM filter is unparalleled in removing bacteria and odors from LG Refrigerators. It helps reduce the activity of bacteria by 99.99% and ensures the food stays fresh and hygienic by filtering the internal air.

Hygiene Fresh

***Bacteria:** Staphylococcus aureus, Escherichia coli, Listeria monocytogenes, Klebsiella pneumonia

Confirmed by TÜV Rheinland on all processes and results, the test method referring to the ASTM E2149 test protocol.

The bacterial removal performance is that the number of bacteria was counted before and after an hour (1hr) reaction wherein fractions (1.0g) of the filter were put into the 50ml diluted bacterial solution. Results may vary in real use conditions.

Freshness

DoorCooling⁺™

Delivers freshness evenly & faster.

Food stays fresh and drinks get ice-cold on any shelf with even and faster cooling performance.

What is DoorCooling⁺™ ?

LG's exclusive DoorCooling⁺™ technology cools 35%* faster than a conventional cooling system. As the cold air spreads evenly across the refrigerator, it gives you fresher food and colder beverages on every shelf.

*Based on UL test results using LG's internal testing method comparing time for the temperature of the water container placed in the top basket to drop between DoorCooling⁺™ and Non-Door Cooling+ models. Applicable models only.
The images of the product are for illustration purposes only and may differ from the actual product.
DoorCooling⁺™ is supposed to stop when the door is opened.

DoorCooling⁺™ for Everyone.

The all new LG Frost-Free Refrigerators are designed for everyone. Be it a milkshake for the youngest in the family or a beverage for the eldest, the DoorCooling⁺™ technology keeps everything evenly cool.

CHILDREN

Children like to play all day, and when they get tired, simply cool them off with a cold beverage.

YOUNGSTERS

Lukewarm beverages bring down the energy of a party. Get ice-cold beverages anytime and get that party going.

MOTHERS

Don't hesitate while keeping food in the side door. DoorCooling⁺™ provides cold air evenly, everywhere.

FATHERS

After a hectic workday or while watching soccer on TV, get your ice-cold beverage immediately.

Freshness

Fresh 0 Zone

Start cooking without unnecessary defrosting.

It provides optimum temperature for vegetables, fish, meat and dairy food items like cheese and butter, and maintains freshness for a long time.

Fresh 0 Zone provides the ideal atmosphere to store food without having to freeze it.

The cover in the front and the direct air vent from the back can maintain a lower temperature than the other fridge compartments. So, you can cook fresh vegetables, fish & meat with Fresh 0 Zone, anytime.

ALL NEW LG Frost-Free Refrigerator

Convenience

Intuitive user experience that elevates your lifestyle.

Convenience

Presenting
Wi-Fi Convertible
Convert freezer to fridge from anywhere!

Presenting India's first Wi-Fi Convertible Refrigerator by LG that gives you the power to convert your freezer into a fridge from anywhere with AI ThinQ.

So, whether you're miles away from home, engrossed in work at the office, or unwinding on a vacation, enjoy peace of mind with the convenience of switching your refrigerator's modes remotely.

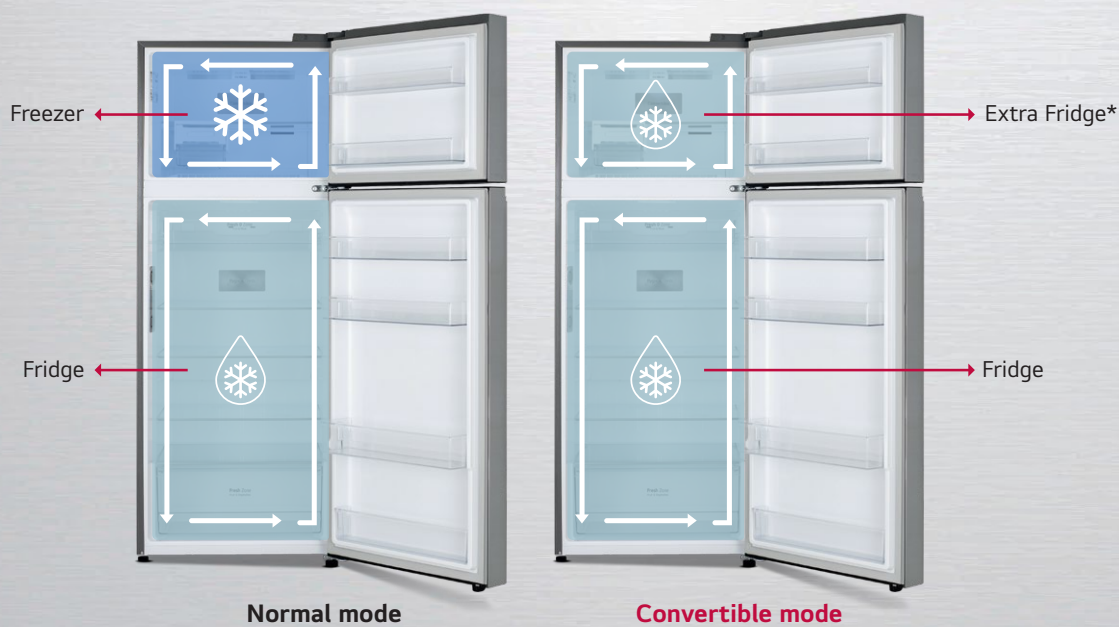

Convenience

Convertible

Store more food with LG Convertible mode.

In India, most of the time, the fridge is stuffed with both cooked and raw food, while the freezer remains unoccupied. Now, you can use the freezer as a fridge and keep your food and vegetables fresh by converting the freezer into a fridge.

Convenience

Movable & Detachable Ice Maker

Exceptional ice maker with easy functionality.

LG Frost-Free Refrigerator's top freezer has a detachable & sliding ice maker. So, now you can adjust the ice maker to make more space in the refrigerator or take it out entirely.

Slide It Both Ways

Place it on the right side or on the left, your wish!

Detach Ice Tray

Easily detach ice maker to store your favorite food.

Twist It Easily

Twist the ice maker with just 1 finger.

Ice Container

Left with extra ice?
Don't worry! It has its own
container to store ice.

Convenience

Pull-out Tray

Now even the innermost area is accessible.

Pull-out tray slides out to bring the innermost area within our reach.

ALL NEW LG Frost-Free Refrigerator

Energy Saving

Smart Inverter Compressor™
from the leaders of energy saving.

Energy Saving

Smart Inverter Compressor™

Energy efficient & long-lasting.

LG's Smart Inverter Compressor™ has taken energy efficiency to a whole new level, now you can save both money & the planet.

It cools the machine based on the load inside the refrigerator. While conventional compressors always work at high capacity, the LG Smart Inverter Compressor™ checks the actual demand to supply the optimal level of cooling to save energy and keep food fresh.
