LG x Logitech Video Collaboration

Work Smarter with Video Conferencing Solutions by LG & Logitech

Ensuring business continuity, employee welfare, and workforce productivity are top priorities for companies of all sizes. Logitech, a global leader of peripherals for PC and video conferencing, and LG, a global leader in the professional display industry, introduce a variety of conferencing devices and solutions for corporate environments from personal workspaces to conference rooms. LG's extensive range of products, matched with Logitech's simple and intuitive video conferencing solutions, offer an excellent work environment to help overcome challenges faced by hybrid working teams.

Work has changed. Many organizations have moved to video conferencing for many reasons, including schools, (virtual classrooms), medical appointments (telemedicine) as well as building out safe meeting rooms in workplaces.

This moment is an opportunity to reimagine workspaces, making them more connected and collaborative, wherever work needs to happen. The collaboration between LG and Logitech offers flexible video conferencing solutions that can be used in a variety of spaces to help keep your employees and customers connected.

We are here to support your teams to collaborate and make quick business decisions through fast, efficient and reliable video conferencing capabilities from various locations.

Benefits from LG & Logitech Collaboration

Simple and Intuitive Meeting Experience

LG and Logitech offer you a meeting room package that includes LG's, high quality meeting room display with Logitech's intuitive video conferencing devices. Plug-and-Play to set up, one touch to start the meeting, and you are ready to be heard and seen clearly with excellent picture quality.

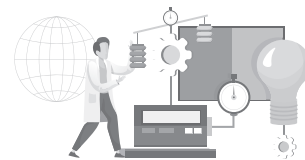

Integrated Configuration with Enterprise Code

Take advantage of LG/Logitech enterprise code which automatically configures and optimizes the display to meet the visual, audio, and support aspects of the Rally Bar solution. This feature allows for a quick set up and user implementation.

Market Proven Devices

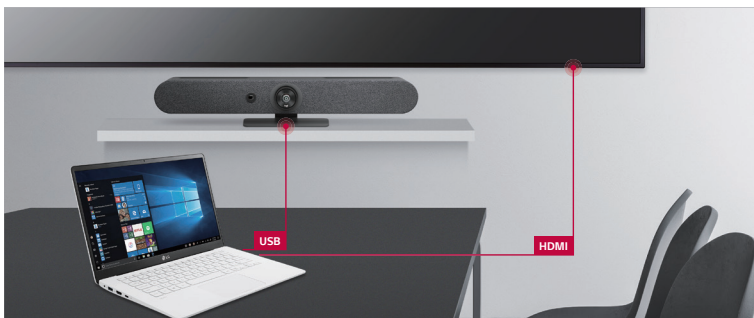

LG and Logitech are continuously exploring customers' needs and developing innovative technology in their own specialized fields. This collaborative effort has resulted in optimal solutions that help turn nearly any space into a functional meeting space.

Video Conferencing Made Simple.

Connect via USB or run in appliance mode* to go from box to video conferencing quickly and easily.

TYPE 1 Direct Plug and Play with your own devices

Turn on the display and the camera by connecting to your devices**.

During the meeting, easily switch between presenters through the use of a cable connection.

TYPE 2 One Touch Start with Logitech Tap

Touch and start a video conference with simplified workflows.

Instantly share content and easily switch video conferencing to an in-room meeting.

All-in-one meeting room solution certified to work with the leading video conferencing platforms*, no computer needed. Or connect via USB using compute of choice.

* Certified to work with Google Meet, GoTo Meeting, Microsoft Teams, Pexip, Ring Central, Zoom

** In case of LG Signage, DPM (Display Power Management) needs to be enabled within the Installation Menu, and it may not be available in certain products.

Why LG Meeting Room Displays with Logitech

Quality

IPS technology featuring a wide viewing angle, as well as high resolution up to UHD. This enables the clear delivery of messages by showing documents including both image and video to help minimize distortion. Logitech's HD video and RightSense™ technologies provide remarkable clarity and quality. Paired together you'll have high quality solutions for both small and large meeting rooms.

* Specific features can differ from product to product and may not be available on all products.

Engagement

A simple connection is possible through a diverse interface allowing the connection of different devices to the screen. Also, collaboration between LG & Logitech allows users to easily participate and stay focused during your meetings.

* Specific features can differ from product to product and may not be available on all products.

Reliability

To ensure your meetings run smoothly, displays should be working properly, even if there are several continuous meetings for long periods of time. LG Signage provides a reliable and stable performance through the use of SoC (System on Chip).*

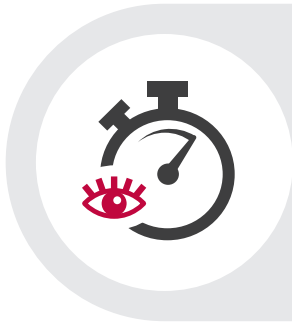

Specific features can differ from product to product and may not be available on all products.

Unique & Multi Purpose Products

LG's wide range of products, including LED Signage, UHD Signage, 88" Ultra Stretch, and UltraWide™ Monitor, combined with Logitech's diverse range of video conferencing equipment meet the various needs of many meeting rooms. Adapt your space to your individual needs with a variety of integrated product combinations.*

* Please contact to LG sales representative in your region to find best products for your spaces and concepts.

Monitoring and Management

With LG ConnectedCare (an optional service, not included*), LG Signage can be monitored in real-time to help provide a reliable meeting experience. Also, streamline staff training with Logitech Tap adding "one-touch join" control to the meeting room.

*This is an optional service available at additional cost. Availability may differ by region and this optional service may not be available for certain LG products. Please contact an LG sales representative in your region for further details.
