Superb Transparency

The LG Transparent Color LED film shows objects behind the glass even when the film is attached to the glass and turned off. This offers a wide-open view while blending into existing interior design smoothly and delivers various information effectively. In addition, LG has actually reduced the size of the individual LED packages for the LTAK series, providing improved transmittance over the previous LG model (LAT Series).

Self-adhesive Film

The LTAK Series is self-adhesive, so it can be easily attached to the surfaces of existing window glass without the need for any expensive replacement.*

*Installation conditions may vary depending on the performance environment.

Outstanding Expandability and Flexibility

The size and layout of the film can be customized to fit into the installation area. It can be expanded by adding more films in a vertical or horizontal way, or cut in parallel with the bezel to meet size requirements.

webOS Smart Platform

LG webOS is a web-centric platform, making it easier for system integrators and developers to build web-based solutions according to various environments. By supporting the Signage Common Application Platform (SCAP) and compatibility with HTML, CSS, and JavaScript, developers can efficiently create virtually any solution for their customers.

Control Manager

Through the internet-connected control manager, you can set, control contents and monitor the status of multiple displays in different locations in real time. This is especially useful for LG Transparent Color LED film installed over a large area, because the control manager makes it easy to play and check content.

Real-time LG ConnectedCare Service

Powered by LG's high performance system controller, the LSAC series is compatible with LG software solutions including SuperSign CMS, LED Assistant, and ConnectedCare, which help customers have even more control over their systems.*

* LG ConnectedCare and LG SuperSign CMS are each sold separately. Actual user interface may vary in different webOS versions.
