

**FOR IMMEDIATE RELEASE**

**NEW LG DISHWASHERS CERTIFIED TO SANITIZE;  
ADVANCED DRYING HELPS ELIMINATE WATER SPOTS**  
*Double the Spray Arms, Powerful TrueSteam, and Dynamic Drying Technology  
Combine for LG's Best Result Yet*

**ENGLEWOOD CLIFFS, N.J., Sept. 23, 2020** — As people spend more time at home, U.S. households are using dishwashers more than ever. Designed for advanced cleaning and flexible capacity, the updated line of Wi-Fi-enabled, smart **LG QuadWash™ dishwashers** feature Dynamic Dry™ technology to help eliminate water spots and drying by hand, and they are certified by experts to sanitize dishes, glasses and more.<sup>1</sup> Plus, LG models with TrueSteam® are the only in the industry to deliver two separate blasts of real steam from powerful steam jets for better cleaning and drying that eliminates water spots by up to 60 percent.<sup>2</sup>

**A Spotless Clean the First Time**

LG's exclusive **QuadWash technology** gets dishes clean the first time with four powerful spray arms instead of the standard two. Its Multi-Motion arms rotate back and forth while spinning to power-clean dishes from multiple angles throughout the entire cycle – saving users the time and headache of having to prewash or rewash dishes by hand.

**Drier Dishes and Fewer Water Spots**

Dynamic Dry™ technology built in to all LG dishwashers delivers faster, more complete drying of dishes, glasses, utensils, containers and more so they are ready for storage or your table right off the rack. Dynamic Dry enhanced with TrueSteam (models **LDP6810, LDP7808, LDT7808**), transforms the power of steam into ultimate drying for 60 percent fewer water spots for brilliant, sparkling glassware and more — no more wasting time and effort wiping spotty glasses by hand.

Only LG TrueSteam delivers two separate blasts of real steam for better cleaning and drying. The four powerful steam jets on the door, plus additional jets on the interior top and bottom, deliver powerful steam at the start of the cycle to penetrate caked-on foods while LG QuadWash

powers through debris leaving no trace behind so you can skip the sink with no pre-rinsing needed. At the end, steam helps super-heat the interior for drier, sparkling dishes and glassware.

### **Certified to Sanitize**

With sanitization a priority, LG dishwashers enable users to clean and sanitize with confidence. All 2020 models are certified by the National Sanitization Foundation to reduce bacteria on dishes by 99.99 percent and reach a final rinse temperature greater than 150°F when operated on the steam cycle of TrueSteam models or the High Temp Cycle of other LG dishwashers.

### **More Flexibility Means No Dish Left Behind**

The height-adjustable third rack holds more items so users save time and wash fewer loads – and it's perfect for everything from flatware and long-handled utensils to small espresso cups (models [LDP6810](#), [LDP7808](#), [LDT7808](#), [LDP6797](#)). The adjustable main upper rack makes short work of after-dinner cleanup. Three height settings adjust effortlessly and smoothly to make room for tall stemware on top or oversize pans below. Plus, the customizable tines offer more flexibility for loading large platters, bowls and pots without compromising performance.

### **Everyday Convenience You Can Count On**

The exterior PrintProof™ finish options make it easy to keep the dishwasher looking as clean as the dishes – and smart features inside offer the ultimate in convenience. With the LG ThinQ® mobile app, users can see how much time is left on a wash cycle or receive alerts on their smartphone when dishes are clean. Use simple voice commands with Amazon Alexa or the Google Assistant to check cycle status, and set up Amazon Dash Replenishment Service to automatically deliver a new shipment of detergent to your door before you run out.

### **Available Now**

LG QuadWash dishwashers are available now at retailers nationwide. All are ENERGY STAR® certified, delivering energy efficiency without sacrificing performance.
