FOR IMMEDIATE RELEASE

**LG REINFORCES COMMITMENT TO B2B SMART INNOVATIONS,
COMPREHENSIVE ENERGY-EFFICIENT BUILDER SOLUTIONS**

*LG Electronics USA Earns Multiple 2025 Honors from Green Builder Media:
HVAC and Appliance Sustainable Brand Leader, Sustainable Products of the Year*

ENGLEWOOD CLIFFS, N.J., April 21, 2025 – LG has been named the *2025 Sustainable Brand Index Leader* in both the HVAC and Appliance categories by *Green Builder Magazine* for the second consecutive year. Announced on the eve of Earth Day 2025, this is a powerful endorsement of LG Electronics USA's continued leadership in delivering energy-efficient, innovative solutions for homebuilders and homeowners alike.

"LG continues to refine its practices and reinvent its processes and product innovations to reduce its environmental impact in a way worthy of distinction," said Sara Gutterman, CEO of Green Builder Media. "The company's commitment to sustainability reflects a deep understanding of what today's consumers value—reliability, efficiency and innovation."

In addition to being singled out as the leading sustainable appliance and HVAC brand, LG earned two *2025 Sustainable Products of the Year* distinctions for ENERGY STAR® certified induction cooking innovations, showcasing LG's ability to fuse sleek, modern design with advanced energy-efficient technology that transforms the kitchen experience.

- **LG Smart Induction Slide-in Range:** Blending sleek design with powerful performance, this range (model LSIL6332FE) combines fast, precise induction cooking with a 6.3-cubic-foot ProBake® Convection oven for even baking and air-fry functionality, wrapped in a flush, built-in aesthetic. With LG ThinQ® app connectivity and a cookware compatibility indicator, it offers a smarter, more efficient way to cook.

- **SKS 36-inch Pro Induction Range:** Designed for serious home chefs, this pro-style range delivers commercial-grade performance with a 7,000-watt induction element, Flex Cooking Zones, and a spacious oven powered by SKS ProHeat™ Convection. With Smart Knobs,™ 13 cooking modes including steam sous vide, and a 10-minute Speed Clean™ cycle, model SKSIR360IS delivers a luxury experience backed by smart technology. (SKS is LG's fast-growing luxury appliance brand.)

Beyond its award-winning appliances, LG supports builders, developers and designers through the LG Pro Builder program, a one-stop resource for high-performance, builder-focused solutions designed to power today's connected, energy-efficient homes. Offering solutions ranging from advanced HVAC systems to heat pump water heaters and smart home electronics, LG Pro Builder simplifies the building process by providing a single-source solution that empowers professionals to deliver homes that are both future-ready and seamlessly integrated.

Empowering builders to create efficient and homeowner-friendly homes, LG's ThinQ® smart home platform enhances connectivity, convenience and efficiency using AI-powered technology. ThinQ offers personalized features that extend product life and simplify future upgrades, including the monitoring of energy consumption and usage.
